Nikia,
Can you add to this?

This needs work.

We need status of the Lit Review.
Actions that state and county are taking re: brain cancer study
Agenda for the Feb 5th roll out, including who will attend from EPA and who will be at the meeting.
Media inquiries, articles and interviews on all to the above.

1/22 EPA will participate in a conference call with the State Epidemiologist to discuss the brain cancer study. This meeting was requested by the State to brief us on their finding and general conclusions of the study.

The State will also have their QA/QC chemist join the call to discuss their recent review of the data provided by Dr. Hailer from MT Tech. Dr. Hailer is the only team member to respond to our request for QA/QC data from the research paper on meconium.

Contact has been initiated with the editor of the Journal that published the meconium study, but email has not been responded to, CharlieP will follow-up via telephone. The purpose of this contact is to determine the requirements for a letter to the editor or a request for retraction.

CharlieP is scheduled to present the meconium literature search results to the Butte Board of Health 2/5/20 7am
CharlieP is scheduled to present the meconium literature search results to the Council of Commissioners 2/5/20 7pm

1/21-1/24 create Powerpoint presentation on meconium study

Montana Resources shared with EPA a copy of their memo summarizing their critical analysis of the meconium study

Hi Dan and Charlie,

Can you provide a quick update on any new information on the Meconium lit review and Brain Cancer Study.

Thanks!
